

## Project Management Bootcamp

(Nov) PABS2495, (Mar) PABS2497, (May) PABS2499

A three-day workshop on project management fundamentals for project leaders. This course is aligned with the Project Management Institute's (PMI) Body of Knowledge, yet leverages practical experience that will provide insightful tips and techniques for Managers and Executives who are placed in project management roles. The three days of instruction will provide participants with the necessary educational requirements for the PMI's Certified Associate in Project Management (CAPM)<sup>®</sup> professional designation. Once the workshop is completed, participants will need only to challenge the PMI CAPM exam to earn their designation.

### Topics:

- How to design projects for sustainable success
- How to manage limited resources
- Project leadership and team management techniques
- Workplan and budget development methods
- Stakeholder relationship management approaches
- Project risk management tools and techniques

### Learning Outcomes:

- Practical understanding of the fundamental processes and phases of a project from conception to completion
- An understanding of the most logical and efficient ways to solve organizational problems with projects
- Hands-on experience with the development of project designs, workplans and budgets
- Increased confidence in one's ability to successfully lead projects

**Facilitator: Will Fong** is a Senior Consulting Manager with Meyers Norris Penny LLP, and the subject-matter expert for MNP's Project Management training programs. He has more than ten years' experience in project management, business process improvement, stakeholder engagement and strategy. Will focuses on an interactive, hands-on approach that encourages participants to actively apply the tools and techniques presented during the course bringing real-world examples of what works well and what doesn't as he draws upon the experiences he has acquired and those of the other participants in the course.
